

The spreadsheet has an overview tab that lists the Amtrak lines that have roll-on bicycle service, the sort options for the timetable pages, and general information about Amtrak policies, and how to download a timetable. There is also a list of key points for cyclists traveling on Amtrak.

After the overview tab, there is a page for each timetable. The tabs for these pages are labeled as 1H (first half) or 2H (second half) of the year. The most current timetable is always on the second tab in the spreadsheet. Older pages follow it, for those who might want to see what changes have been made over time.

Under the Data Menu, you can find the Sort & Filter functions. Choose "Custom Sort" to see a list of topics for sorting.
